

Use KWHotel on Mac OS

KWHotel can now be deployed on the Macintosh operating system, thanks to the Parallels Desktop Business software. Your whole user experience and functionalities remain the same as on the Windows PC.

How does it work?

- 1) Parallels Desktop Business software is installed on your Mac
- 2) Using Parallels, you can run Windows alongside your Mac OS
- 3) You may now install and use KWHotel on the emulated Windows

What are the requirements?

There are 3 programs required to run KWHotel on Mac OS. For your convenience, they are presented in the table below.
